Re: CID NO. 263617

[REDACTED]
Act 223 Section 208 Determination
Glade Twp, Warren County

Dear [REDACTED]

The Department has investigated, in response to your May 26, 2009 complaint, the possible diminution of your water supply by nearby oil and gas activities.

After reviewing the results of your water analysis, the Department has concluded that recent oil and gas activity did cause your water supply to become diminished. However, it appears that Homeland Energy has restored your supply through deepening your well and cleaning your filters and treatment system. The results of final water tests taken on January 20, 2010 indicate that your water meets drinking water standards and in some cases exceeds pre-drill test results. This closes this investigation.

Enclosed are the complete water sample analysis results and a fact sheet to help you interpret the report. If you have any questions, or if any future issues arise, please contact me at 814-723-3273.

Sincerely,

Richard Mader
Water Quality Specialist
Oil & Gas Management
